EL CHEAPO POOR EXCUSE NEWSLETTER

Please accept a sincere apology from your newsletter dude, business and other commitments this month will not allow you to be burdened with the usual four or six page long-winded multi-subject manifesto that you normally must endure. Perhaps next month will see something more worthy of bearing the Chapter 40 Flight-Line name...

NOW GET YOUR MONEY OUT OR ELSE !

This month's meeting will feature none other than the subject of a recent newsletter article, and allow you to *actually do* what was so strongly suggested in that article. Get your money-bags out from under the mattress, show up on October 20th, and be ready to throw some of that ~~hard-stolen~~ hard-earned money at **Mr. Jack Norris**.

Jack will be making available the fruits of his many years of labor, in the areas of flying more efficiently and the correct design of **propellers**. Folks, this is no ordinary minor league research project! Jack Norris is not only a rocket scientist with the resume' and experience to back that lofty title up, but he's also a pilot and airplane lover. Jack has attacked two of the most complex, hard to understand issues and made them understandable for the rest of us. Not only does he routinely offer to explain these mysteries to the uneducated and non-scientific masses, but he now offers to give up *both* of these secrets in *one* book... for about half the price of a decent book on only one of the two subjects!

This month's meeting will feature Jack Norris' long-awaited presentation of his book, "Propellers, the First and Final Explanation / The Logic of Flight".

The books will be available for sale at the positively subterranean price of \$15.00 or so. This amounts to a college level education on how to get the most out of your airplane, and a Master's level education on how propellers really work. Do NOT miss this !
